ARCHÆOLOGY IN SUFFOLK, 1964

By ELIZABETH OWLES, B.A. and NORMAN SMEDLEY, M.A., F.S.A., F.M.A.

Although the value of this index is naturally greatest to those engaged in research on the various periods or subjects recorded, it is hoped that the introduction at least may be read by members with general rather than specialist interests. To these, therefore, an appeal is made to report to the Ipswich Museum any finds of which they may become aware, giving as many details as possible, e.g.,

- 1. Locality, with a National Grid Reference if this is possible, or such details as may enable this to be worked out.
- 2. Name and address of owner of the site.
- 3. Nature of any material finds, with name of finder if this differs from that of the informant.
- 4. Whether any excavation has been carried out. The urge to dig and to collect is strong, but should be held in check unless the digger is fully trained and competent to carry out the work according to modern standards, to draw and interpret accurate measured plans and sections, take photographs, and prepare a report suitable for publication in an appropriate journal. Excavation inevitably involves destruction of the evidence, and should not be lightly undertaken merely to satisfy curiosity or, worse still, for the purpose of 'collecting specimens'.

Valuable work can be done by amateurs, not only in helping with excavations under supervision, but by carrying out field surveys. A report is badly needed on the present state of existing monuments, especially tumuli. Even those which are protected by scheduling are liable to gradual levelling by ploughing which is still, unfortunately, permitted. Air photography by amateurs has added a number of new records, especially of tumuli, but also of buildings and roads.

In the list which follows, the names of those originating reports appear in brackets, and abbreviations are used as follows:—

I.M. Ipswich Museum, the reference number following if the material is in the Museum.

Mild.M. Mildenhall Museum.

M.H. Moyse's Hall Museum, Bury St. Edmunds; material is in that Museum unless otherwise stated.

S.M. Southwold Museum.
