Likewise the same ought to plough de beneherthe 11 acres and 1 rood as the same season, thus for each acre half an acre. Likewise 6 Monday-lands ought to plough 4 acres at the same season. Sum of the acres to be ploughed 140 acres.

Likewise (the tenants) of the aforesaid  $22\frac{1}{2}$  lands ought to reap de gabulo four score and ten acres, thus for each land 4 acres. Likewise (the tenants) of the 8 Monday lands (ought to reap) 32 acres. Likewise de beneherthe (the tenants) of the same lands (ought to reap) 45 acres at the least, thus for each land half (?two) an acre.
