## NOTES ON CONTRIBUTORS 2024

SUE ANDREWS has written about Suffolk's history for fifty-five years. With a day job teaching infants, she devised a house history course taught as adult education classes for the University of East Anglia, the Society of Genealogists and Suffolk County Council. Given early retirement owing to ill health, she was Hadleigh Archive's honorary archivist from 1996–2012, researching its documents for her MA in Local History (University of Essex) concerning charitable responses to poverty and for *Hadleigh and the Alabaster family: the story of a Suffolk town during the Tudor and Stuart periods* (2005) with Dr Anthony Springall. In 2020 the British Association for Local History awarded her work on Hadleigh's relationship to Cosford Incorporation, which led to a study of the development of all Suffolk incorporations presented at Suffolk Local History Council's conference in 2023.

LAWRENCE BILLINGTON is a post-excavation Project Officer at Oxford Archaeology. Lawrence graduated from the University of Bristol in 2004 and has since worked for various commercial archaeological companies as well as studying for an MA in European Prehistory (University of Sheffield) and a PhD on the Upper Palaeolithic and Mesolithic of East Anglia (University of Manchester/Historic England). Lawrence is a specialist in the study of lithic assemblages and his main area of interest is the Mesolithic to Early Bronze Age of eastern England.

KEITH BRIGGS was born in Cambridge. He is professionally a mathematician and has worked in universities and the telecommunications industry. He has been interested in language history and onomastics from an early age and has worked on Suffolk place-names for the last fifteen years. He wrote a volume on this topic jointly with Kelly Kilpatrick in 2016, published jointly by SIAH and the English Place-Name Society (EPNS). He has published many articles in the academic literature on place-names and Middle-English word-history, largely on Suffolk names and using Suffolk documents, and is now working on a much larger survey of the county's place-names, finding them to be a rich source for local history and dialect. He is a council member of the SIAH, the EPNS, and the Society for Name Studies in Britain and Ireland. Email: k.briggs73@btinternet.com.

MATT BRUDENELL is Director of the Cambridge Archaeological Unit and formerly a Senior Project Manager for Oxford Archaeology. Matt has a deep and abiding interest in the archaeology of eastern England, with over twenty years' experience of working in the region, both directly within the commercial sector and in research on material generated from development-led archaeology. He has a degree in Archaeology and Anthropology from the University of Cambridge and completed a PhD at the University of York in 2012, after which he returned to work within the commercial sector. Matt's primary research interests lie in the archaeology of the Cambridge region and the later prehistory of eastern England – specifically the Later Bronze Age and Iron Age – with a focus on ceramics, settlements, landscapes and the practical engagements between people, things, and places.

NICK COX is a Project Officer for Oxford Archaeology. He graduated from Bradford University in 2008 and has since worked continuously in commercial field archaeology, predominantly in the south and east of England.

LINDSAY LLOYD-SMITH works in post-excavation for Wardell Armstrong LLP. He has collaborated on a number of excavation reports and publications of sites in eastern England, including the multiperiod site of Chilton Leys (Stowmarket), the late Roman cemetery at Great Whelnetham, an early medieval farmstead at Arkesden (Essex), and the Late Bronze Age enclosure at Wennington (Havering, London). Email: lloyd-smith@wardell-armstrong.com.

JEZZ MEREDITH is a Senior Publications Officer with Cotswold Archaeology (Suffolk Office) and has been involved in the excavation and writing up of projects in Suffolk and East Anglia since 1999 (previously working for Suffolk Archaeology and for Suffolk County Council Archaeological Service). Jezz was responsible for the Barber's Point community excavations near Aldeburgh and the long running excavations at Wangford quarry near Southwold. His interests include prehistory, multiperiod sites and public engagement with archaeology.

ANDREW A.S. NEWTON works in post-excavation for Wardell Armstrong LLP and, prior to that, was with their predecessor organisation, Archaeological Solutions Ltd, since 2005. In that time he has authored a number of excavation reports and publications on sites in eastern England, covering a wide range of periods and including the notable sites at Blackhorse Farm, Sawtry (Cambs), Dernford Farm, Sawston (Cambs), and Manor Farm, Chadwell St Mary (Essex). Email: [anewton@wardell-armstrong.com](mailto:anewton@wardell-armstrong.com).

LIAM PODBURY works in post-excavation and heritage consultation for Wardell Armstrong LLP. He has collaborated on a number of excavation reports and publications of sites in eastern England, including a medieval salt production site in Terrington St Clement (Norfolk), a Roman pottery production site at Lavenham (Suffolk), a medieval manorial feast site in Fincham (Norfolk), and a Saxo-Norman to medieval farmstead at Knapton (Norfolk). Email: [lpodbury@wardell-armstrong.com](mailto:lpodbury@wardell-armstrong.com).

TOM WOOLHOUSE is a Senior Project Manager with Pre-Construct Archaeology Ltd (PCA). After studying history at Cambridge University, he has worked in development-led archaeology in East Anglia for twenty years, directing excavations and bringing sites to publication in a number of local, regional and national journals and monograph series. His archaeological interests are wide-ranging, including the transition from Roman to early medieval Britain, and the evolution of rural settlements and agricultural landscapes from later prehistory to the present. His current role with PCA involves managing all stages of commercial archaeological projects, including fieldwork, post-excavation analysis and publication. E-mail: [twoolhouse@pre-construct.com](mailto:twoolhouse@pre-construct.com).
